

## Lecture syllabus - GEL 1: The Earth - Fall 2018

**Dr. David Osleger** [daosleger@ucdavis.edu](mailto:daosleger@ucdavis.edu)

Office: Earth & Physical Sciences (EPS), room 3224

Office Hours: Monday 1:00-2:00 & Wednesday 2:00-3:00

*We'll try to stay as close to this schedule as possible, but be ready for evolving dates and topics (except for exams, of course).*

*Read the textbook strategically – I'll give you tips and suggestions about how to use the book in class. The specific sections to read in the textbook may evolve as the quarter progresses. Check the online notes I provide for the updated and accurate sections in the textbook, listed toward the top of each set of notes.*

***Please read and understand the GEL1 Canvas site.***

<b>Week of:</b>	<b>Lecture Topic:</b>	<b>Textbook</b>
9/26 – 10/1	Introduction; How Planets Form; Inside the Earth	Sections 1.3, 1.6-1.8
10/3 - 10/8	Plate Tectonics: Mapping the Seafloor & Divergent Boundaries	2.1, 2.3, 9.1, 2.5, 9.3, 9.4
10/10 – 10/15	Plate Tectonics: Convergent & Transform Boundaries	2.4, 9.5, 9.6, 9.7, 9.8
<b>10/17</b>	<b>Midterm 1</b> (50 minutes, bring Scantron 2000)	
10/19 - 10/24	Minerals & Rocks	3.2, 3.6, 3.7
10/26– 10/29	Deep Beneath Volcanoes	4.1, 4.2, 4.3, 9.2
10/31 - 11/5	Volcanism	4.6-4.7
11/7	begin Earthquakes	11.1-11.5
<b>11/9</b>	<b>Midterm 2</b> (50 minutes, bring Scantron 2000)	
11/14 – 11/19	Earthquakes continued . . .	11.1-11.5
11/21 - 11/28	Sedimentation; Deep Time; Age-dating	6.1, 6.4, 6.5, 8.1, 8.3, 8.4, 8.6-8.8
11/30 - 12/3	Energy Resources: The Age of Oil	19.1, 19.2, 19.3
12/5 - 12/7	Glaciers, Ice Ages, & Climate Change	15.1, 15.4, 20.1- 20.5, 20.8
<b>Thurs. 12/13</b>	<b>Final Exam</b> – 3:30-5:30 PM (comprehensive, scantron)
